

North Savo Talent Hub

- Study and work in Eastern Finland -

#NorthSavoTalentHub

Talent Hub activities in the North Savo region focus on:

- employment opportunities for international students
- service and career paths for international experts
- constructing coordinated network activities

As a result, the number of international university graduates finding work in North Savo will mount. They will be better prepared for the Finnish work market and for becoming equal members of Finnish work communities. Less complicated recruitment processes for international experts will also provide an answer to the labor shortage of local companies.

North Savo Talent Hub project: <https://talenthub.savonia.fi>
